

ASSAM STATE SCHOOL EDUCATION BOARD (Div-II)
GUWAHATI-21
SAMPLE QUESTION

LOGIC & PHILOSOPHY
FOR HIGHER SECONDARY COURSE

UNIT - I : Nature of Inductive Enquiry Various Kinds of Induction

1 marks Question (Very Short)

- a) What is the subject matter of logic?
- b) Is Logic a normative Science?
- c) In deductive inference, we proceed from general to particular proposition- Is it True?
- d) In Inductive inference the conclusion is more general than the premises – Is the statement true?
- e) What is the ideal of logic?
- f) Deduction deals with formal truth/ material truth/both
- g) How many kinds of Inference are there?
- h) What is the essence of Induction?
- i) What is the essence of Analogy?
- j) In Analogy, we proceed from particular to particular/general to particular.
- k) Induction deals with formal/material truth/both
- l) The conclusion of unscientific induction is certain/probable.

2 marks Question (Short)

- a) What is reasoning? What are its kinds?
- b) What is deductive inference?
- c) What is inductive inference?
- d) What is analogy?
- e) How many kinds of induction are there? What are they?
- f) Define induction proper.

- g) What is induction properly so called?
- h) What are the kinds of analogy?
- i) What is scientific induction?
- j) What is unscientific induction?
- k) Give an example in inductive inference.
- l) Define good analogy.
- m) Define bad analogy.
- n) State any two characteristics of scientific induction.
- o) State any two characteristics of unscientific induction.
- p) State any two characteristics of analogy.
- q) Define inductive leap.
- r) State two relations between scientific and unscientific induction.
- s) State two relations between good and bad analogy.
- t) Scientific induction is based on two kinds of observations. What are they?
- u) Give an example of bad analogy.
- v) Scientific induction is based on two principles. What are these?

3 marks Question (Short)

- I. State three dissimilarities between scientific and unscientific induction.
- II. Distinguish between good and bad analogies.
- III. Define induction proper with examples.
- IV. How many kinds of induction proper? What are these?
- V. How many kinds of induction improperly, so-called? What are these?
- VI. Distinguish between scientific and analogy.
- VII. Distinguish between unscientific and analogy.
- VIII. Define law of causation with a suitable example.
- IX. Define necessity of induction.
- X. Is the conclusion of analogical argument probable. Give reasons?

6 marks Question (Briefly discuss)

- I. Distinction between Deduction and Induction.
- II. Discuss the nature of Analogy.

- III. Discuss the value of Analogy.
- IV. What is scientific induction? What are the characteristics of Scientific Induction?
- V. What is unscientific induction? In what sense unscientific Induction paves the way for Scientific Induction.
- VI. "Induction supplies the universal premises of deduction." Discuss.
- VII. Unscientific induction is not based on the law of causation. - Why?
- VIII. State three points of relation and difference between Scientific and Unscientific Induction.

8 marks Question (Long answer)

- 1. Scientific induction is based on observation of facts. Explain.
- 2. Discuss the problem of induction.
- 3. What is analogy? What are the different kinds of analogy? Explain.
- 4. Discuss in detail induction proper.
- 5. Explain the inductive leap or Hazard. What are the two ways to remove the difficulties of Inductive hazard?

UNIT - II (CH-1) : Grounds of Induction

1 marks Question (Very Short)

- a) What is the aim of Induction?.
- b) The law of uniformity of nature is a formal/material ground of Induction.
- c) How many kinds of ground of Induction?
- d) Nature behaves similarly under similar conditions Is it true ?
- e) The law of causation is a formal/material ground of induction.
- f) What is the name of the logical fallacy involved in the contradictory statement made by mill about the law of uniformity of nature.

2 marks Question (Short)

- i) How many kinds of grounds of Induction are there and what are these?
- ii) What are the two forms of uniformity of nature?
- iii) What are the two formal grounds of Induction?
- iv) What are the two material grounds of Induction?
- v) Define the law of uniformity of nature according to Mill.

3 marks Question

- i) Define the law of causation with an example
- ii) Define the Uniformity of nature with an example
- iii) Define formal ground and material ground of Induction.

6 marks Question

- a) Discuss the paradox of Induction
- b) Distinguish between the law of uniformity of Nature and the law of causation
- c) Write a short note on the law of Uniformity of nature
- d) Write a short note on formal ground of Induction.
- e) Is Mill's view regarding the paradox of Induction acceptable? give reasons.

8 marks (Long Question)

- a) Explain the formal grounds of Induction
- b) Explain the nature of the world process according to the law of uniformity of Nature.
- c) The ground of Induction is itself the result of induction. Discuss

UNIT - II (CH-2) : Law of Causation

1 marks Question (Very Short)

- i) The law of causation is the Formal / Material ground of Induction.
- ii) How many kinds of cause. according to Aristotle?
- iii) Cause is an antecedent consequent to the effect?
- iv) How many kinds of conditions?
- v) 'Cause is the sum-total of the conditions, positive and negative taken together'- who said the statement?
- vi) What is the name of the fallacy when each and every antecedent of an event is regarded as the cause ?
- vii) State one qualitative mark of cause.
- viii) Cause and effect are relative to each other-Is the statement true?
- ix) Give an example of Formal Cause?
- x) Give an example of Material Cause ?
- xi) The doctrine of Plurality of causes is a _____ notion about causation.

2 marks Question (Short)

- i) Give a definition of cause according to Mill?
- ii) How many types of marks of causation ? What are These?
- iii) What is Efficient Cause?
- iv) Define condition with an example.
- v) What are the two kinds of Intermixture of Effects?
- vi) Define Conjunction of Causes.
- vii) What is Intermixture of Effects?

- viii) State any one quantitative mark of cause.
- ix) What is Final Cause?
- x) What is Formal Cause?
- xi) What is Material cause ?
- xii) Define Homogeneous Intermixture of Effect?
- xiii) Define Heterogeneous Intermixture of Effect ?

3 marks Question

- i) Define Plurality of causes with example?
- ii) Distinguish between Agent & Patient ?
- iii) Write a short note on Moving power & colocation.
- iv) What is the relation between cause and condition?
- v) Distinguish between Cause & condition.
- vi) State any three relation between the Law of Uniformity of Nature and the Law of Causation?
- vii) Define the qualitative & quantitative marks of cause.
- viii) Write a short note on positive & negative condition-
- ix) Explain the law of conservation of matter from the standpoint of quantitative marks of cause.
- x) Write a short note on the quantitative marks of cause from the standpoint of law of conservation of energy.

6 marks Question

- i) Explain the notion of the Plurality of causes.
- ii) Discuss any two qualitative marks of cause.
- iii) Explain the quantitative marks of cause.
- iv) Briefly discuss about the Conjunction of causes and Intermixture of effects.
- v) Explain the Scientific & Popular view of causation.
- vi) Explain the three kinds of Uniformities given by Bain.

8 marks Question (Long answer)

- i) Discuss Aristotle's view of Causation
- ii) Explain different views of causation
- iii) Explain the qualitative marks of causation
- iv) Define cause Describe the qualitative and quantitative marks of cause.

UNIT - II (CH-3) : Observation and Experiment

1 marks Question (Very Short)

- I. How many kinds of material Ground of Induction?
- II. 'Observation is finding a fact and experiment is making one.'- Who said this statement?
- III. What is Experiment?
- IV. State one characteristics of observation.
- V. How many kinds of observation?
- VI. State one characteristics of experiment.
- VII. 'Experiment is a perception of artificial events under artificial arrangement.'- Is the statement true?
- VIII. 'Observation is always selective.'- Is the statement true?
- IX. Give an example of fallacy of Mal-observation.
- X. Observation is a perfection of natural artificial.

2 marks Question (Short)

- I. What are the two material grounds of induction?
- II. What are the two fallacies of observation?
- III. Define Observation.
- IV. What are the kinds of mal-observation?
- V. Give two characteristics of experiment.
- VI. Define universal fallacy of mal-observation.
- VII. Define individual fallacy of mal-observation.
- VIII. Give any one condition of good observation.
- IX. Define the fallacy of non-observation.
- X. What is simple observation?
- XI. State any one advantage of experiment.
- XII. State any one advantage of observation.

3 marks Question (Short)

- I. Is simple observation completely passive experience?
- II. Distinguish between simple observation and experiment.
- III. State the true conditions of observation.
- IV. Distinguish between non-observation and mal-observation.
- V. State any three characteristics of observation.
- VI. Distinguish between individual and universal mal-observation.
- VII. State any three characteristics of experiment.
- VIII. Mention three similarities between observation and experiment.
- IX. 'Observation is regulated perception with a definite purpose.'- Explain.

6 marks Question (Briefly discuss)

1. "There is no qualitative difference, only a quantitative difference between observation and experiment." Explain the statement.
2. What is observation? What conditions are to be followed before observation? Explain.
3. Define non-observation. Explain its kinds.
4. Explain the general conditions of observation.

8 marks Question (Long answer)

1. What is experiment? What are its advantages over experiment? Explain.
2. Explain the characteristics of observation.
3. Discuss the characteristics of experiment.

UNIT - III : Hypothesis

1 marks Question (Very Short)

- i) What is the meaning of 'vera causa'?
- ii) Which is the first stage of hypothesis suggested by Mill's definition of hypothesis ?
- iii) "Hypothesis is always of provisional character"-Is it true?
- iv) The hypothesis Electricity is a fluid- is an example of what kind of hypothesis?
- v) How many stages of hypothesis are there?
- vi) In modern period according to whom hypothesis is of three kinds?
- vii) State any one condition of a legitimate hypothesis.
- viii) Give an example of hypothesis concerning agent.
- ix) How many types of verification of hypothesis.
- x) Give an example of. Explanatory hypothesis.
- xi) What is the third stage of hypothesis?
- xii) What is the last stage of hypothesis?

2 marks Question (Short)

- i) Define a hypothesis. Give example
- ii) What do you mean by stage of deduction in a hypothesis?
- iii) Observation is the first stage of hypothesis-why?
- iv) What is hypothesis concerning collocation?
- v) What are the different forms of hypothesis according to L.S. Stebbing?
- vi) Define Working hypothesis ?
- vii) What do you mean by crucial instance. ?
- viii) Define Descriptive hypothesis
- ix) What do you mean by stage of verification?
- x) What is hypothesis concerning agent ?
- xi) What is analogical hypothesis ? Give example.
- xii) Hypothesis should not conflict with established truths' - why?

3 marks Question

- i) Mention any three conditions of valid hypothesis
- ii) Distinguish between Hypothesis concerning agent and Hypothesis concerning law.
- iii) Define hypothesis concerning law and hypothesis concerning collection.
- iv) Define explanatory hypothesis ? Give Example
- v) Write any one stages of hypothesis with a suitable example.
- vi) State any three characteristics of hypothesis
- vii) What do you mean by crucial instance?

6 marks Question

- i) Mention the characteristics of a hypothesis
- ii) Define Vera-causa with a suitable example.
- iii) Distinguish between, explanatory hypothesis and descriptive hypothesis.
- iv) Write a short note on Working hypothesis
- v) Explain the conditions of a valid or legitimate hypothesis.
- vi) Explain the four stages of a hypothesis:
- vii) Define hypothesis concerning agent with an example.
- viii) Write a short note on hypothesis concerning law?
- ix) Write a short note on Analogical hypothesis?
- x) What are the uses of hypothesis?

8 marks Question (Long answer)

- i) On the basis of different purposes, what are the three main kinds of hypothesis, according to LS. Stebbing ? Explain?
- ii) What is hypothesis? What are the conditions of a Legitimate hypothesis?
- iii) What are the kinds of hypothesis ? Explain the nature of hypothesis

UNIT - IV : Mill's Method of. Experimental. Enquiry

1 marks Question (Very Short)

- i) The Method of Agreement is pre-eminently a Method of Observation" - Is it true?
- ii) How many Experimental Methods are recognised by Mill?
- iii) Does the Method of Agreement yield a conclusion? certain
- iv) How many instances are necessary to apply the Method of difference?
- v) Does the conclusion of the Method of difference is certain?
- vi) How many instances are necessary to apply the Method of Agreement?
- vii) The method of difference is pre-eminently a method of_____.
- viii) What is the aim of Mill's Inductive method?
- ix) " The method of difference is pre eminently a method of experiment " ----- Is it true?
- x) The method of concomitant variation is specially applicable in permanent cause or temporary cause?
- xi) Careless use of the Method of _____ leads to the fallacy of post hoc ergo propter hoc.
- xii) The method of agreement is liable to be vitated by the possibility of _____.
- xiv) How many instances are necessary to apply the Joint Method of Agreement and Difference?
- xv) How many instances are required for the Method of Difference?

2 marks Question (Short)

- i) Why is the conclusion of the Method of Agreement not certain?
- ii) The conclusion of Joint Method of Agreement and Difference is highly probable – why?
- iii) What is Experimental Method?
- iv) Give a concrete example of Method of Difference.
- v) What is the definition of the Method of Agreement?
- vi) Define the Method of Elimination.
- vii) "The Method of Agreement is essentially a method of observation" – why?
- vii) Define Method of Residues.
- ix) Why the Inductive Methods are called methods of Elimination?

- x) On which canon of elimination is the Method of Residues based and why?
- xi) What is meant by the canon of Elimination?
- xii) What is the meaning of the fallacy of post hoc ergo propter hoc?
- xiii) Write the canon of Method of Agreement.
- xiv) Give an example of Method of Concomitant Variation.
- xv) Mention any two advantages of Method of Agreement.

3 marks Question

- i) Why is the Method of Difference called a Method of Experiment?
- ii) Mention any three advantages of Method of Concomitant Variation.
- iii) "The Method of Agreement cannot distinguish between the cause and co-effect" – why?
- iv) State any three disadvantages of Method of Difference.
- v) Write a short note on the fallacy of post hoc ergo propter hoc.
- vi) How are the disadvantages of the Method of Agreement remedied?
- vii) Is the Method of Residues deductive?
- viii) Why are the Inductive Methods called Method of Elimination?
- ix) Mention any three characteristics of Experiment.

6 marks Question

1. Give the definition of the Method of Agreement. Why is the conclusion of the Method of Agreement not certain?
2. Mention three advantages and disadvantages of the Joint Method of Agreement and Difference.
3. How can the disadvantages of the Method of Agreement be removed to some extent? Explain.
4. State three advantages and disadvantages of the Method of Concomitant Variation.
5. Why is the conclusion of the Method of Difference certain? Explain.
6. Explain the Method of Difference with concrete example.
7. Write a note on the Method of Residues.
8. Explain the Method of concomitant Variation with concrete example.

9. Define the Method of Elimination.
10. Define the Method of Residues in your own words. Why do some logicians regard this method as a method of Deduction? Explain

8 marks Question (Long answer)

1. Is the Method of Residues a special modification of the Method of Difference? Explain.
2. State Mill's canon of the 'Method of Concomitant Variation.' Explain the limitation of this Method.
3. Why do some logicians regard the Method of Agreement as a Method of Single Agreement? Briefly explain.
4. Explain with illustration the Method of Difference.
5. What are the fundamental methods of Induction according to Mill? Briefly explain.

UNIT - V : REALISM

1 marks Question (Very Short)

- i) Who is the founder of Scientific Realism?
- ii) Can Naive Realism explain error?
- iii) Name the theory which states that external world can be directly known.
- iv) Who is the author of the book "Essay Concerning Human Understanding"?
- v) According to Naive Realism the relation between knower and known is dependent / independent.
- vi) Name the theory which states that all the qualities of the object are not objective.
- vii) "Primary qualities exist in the objects and are independent from our perception of them" – Is it true?
- viii) "Truth consists in a direct correspondence between knowledge and reality" – Name the theory associated with this statement.
- ix) Which theory of truth does Naive Realism support?
- x) "Secondary qualities are the necessary properties of an object" – Is it true?
- xi) Mention any one characteristic of Scientific Realism.
- xii) Give an example of Secondary quality.
- xiii) Give an example of Primary quality.

2 marks Question (Short)

- i) What is Naive Realism?
- ii) What are Primary qualities?
- iii) "Naive Realism cannot explain error" – why?
- iv) Define Scientific Realism.
- v) What are Secondary qualities?
- vi) Write two characteristics of Naive Realism.
- vii) What is Realism?
- Viii) Name the theory which states that all the qualities of the object are not objective. Define that theory.
- ix) Write two points of criticism against Naive Realism.

3 marks Question

- i) State three general features of Naive Realism.
- ii) Mention three fundamental features of Scientific Realism.
- ii) According to whom primary qualities are objective and secondary qualities are subjective? Discuss.
- iv) What is Realism? What are its different forms?
- v) What are the characteristics of Scientific Realism?
- vi) Is Locke's Scientific Realism a satisfactory theory? Give reasons.
- vii) State any three differences between Scientific and Naive Realism.
- viii) Write a short note on Naive Realism.
- ix) What are the characteristics of Naive Realism?
- x) Write a short note on Primary quality.
- xi) Write a short note on Representation of John Locke.

6 marks Question

- 1. Distinguish between Primary and Secondary qualities.
- 2. Critically discuss Scientific Realism as a theory of reality.
- 3. What is Scientific Realism? What are its characteristics?
- 4. Critically discuss Naive Realism as a theory of reality.
- 5. Mention six fundamental features of Naive Realism.
- 6. Naive Realism states that "External world can be directly known" – Explain this statement.

8 marks Question (Long answer)

- 1. What is Scientific Realism? Explain the criticism against Scientific Realism.
- 2. What are the characteristics of Naive Realism?
- 3. What is Naive Realism? Explain the criticism against Naive Realism.

UNIT - IV : IDEALISM (Subjective & Objective)

1 marks Question (Very Short)

- i) Who says "to be is to be perceived"?
- ii) Who is regarded as the founder of Subjective Idealism in modern period?
- iii) What kind of Idealism has been established by Berkeley?
- iv) Mention the name of a philosopher who criticises Berkeley's Subjective Idealism.
- v) According to which theory, the existence of the external world is dependent on the knowing mind?
- vi) Who is regarded as the founder of Objective Idealism in modern period?
- vii) According to the objective idealism of Hegel, reality is ____.
- viii) According to whom "Thought and Reality are identical"?
- ix) What is the ultimate reality according to Subjective Idealism?
- x) What is the meaning of "Cogito ergo sum"?
- xi) Who propounded the theory of Pre-established Harmony?
- xii) Who wrote the book "The Principles of Human Knowledge"?
- xiii) Who introduced the theory of Monads?
- xiv) Which philosopher denied the distinction between Primary and Secondary qualities?
- xv) Does Berkeley accept material substance?

2 marks Question (Short)

- i) Define Subjective Idealism.
- ii) What is the meaning of "Esse est percipi"?
- iii) Define Objective Idealism.
- iv) What is Idealism?
- v) State two general features of Subjective Idealism.
- vi) What is Objective Idealism?
- vii) Who propounded Pre-established Harmony and why?
- viii) What are Monads?
- ix) What is meant by primary and secondary qualities not being distinct according to Berkeley?
- x) State Berkeley's basic doctrine of Idealism.

3 marks Question

- i) Write a short note on “Esse est percipi”.
- ii) Mention some points of criticism against Subjective Idealism.
- iii) What are the criticisms raised against Objective Idealism of Hegel?
- iv) Mention the general features of Subjective Idealism.
- v) Write a short note on “Cogito ergo sum”.
- vi) What are the characteristics of Monads?
- vii) What is Idealism? What are its different forms?

6 marks Question

- 1. Critically discuss Objective Idealism of Hegel.
- 2. Briefly express the characteristics of Objective Idealism of Hegel.
- 3. Briefly express the characteristics of Subjective Idealism of Berkeley.
- 4. Do you think Subjective Idealism is a satisfactory theory? If not, why?

8 marks Question (Long answer)

- 1. Discuss Berkeley’s view on Primary and Secondary qualities.
- 2. Explain the Doctrine of Pre-established Harmony.
- 3. Explain the theory of Monads.
- 4. Explain Berkeley’s Subjective Idealism.

UNIT - VII : ETHICS AND PURUSARTHAS

1 marks Question (Very Short)

- i) The word 'Ethics' is derived from which word?
- ii) Is Ethics a science or an art?
- iii) What is the object of moral judgement?
- iv) Are non-moral actions object of moral judgement?
- v) How many Purusarthas are there?
- vi) Do you agree that "end justifies the means"?
- vii) What is the etymological meaning of Ethics?
- viii) Is it true that 'character' is the inner counter part of conduct?
- ix) Is habitual action the object of moral judgement?
- x) What is the meaning of the word 'Mores'?
- xi) What is the meaning of the word 'Ethos'?
- xii) Is Ethics a positive science?
- xiii) Is Ethics a practical science?
- xiv) Give an example of positive science.
- xv) Give an example of normative science.
- xvi) Is voluntary action regarded as object of moral judgement?
- xvii) Give an example of non-moral action.
- xviii) "Ethics is the science of the highest ideal involved in human conduct" – who said this?
- xix) "Ethics may be defined as the study of what is right or good in conduct" – write the name of the philosopher associated with this statement.

2 marks Question (Short)

- i) Define Ethics.
- ii) What are the different stages of voluntary action?
- iii) Why is habitual action the object of moral judgement?
- iv) Why is Ethics called a normative science?
- v) Define Moksa.
- vi) What is normative science?

- vii) What is the meaning of Purusarthas?
- viii) What do you mean by Artha?
- ix) Give two examples of voluntary action.
- x) What do you mean by Trivarga?

3 marks Question

- i) What do you mean by positive science? Give examples.
- ii) State three characteristics of voluntary action.
- iii) Distinguish between moral and non-moral action.
- iv) Describe any three non-voluntary actions.
- v) Do you think that Ethics is a practical science? Give reasons.
- vi) Distinguish between motive and intention.
- vii) State three stages of voluntary actions.
- viii) Write a short note on the final stage or consequence of voluntary action.
- ix) What do you mean by conflict of desires?
- x) Write a short note on Kama.
- xi) What are the three ways of attaining Moksa or Liberation?
- xii) Distinguish between positive and normative science.

6 marks Question

1. What is Ethics? Describe the nature of Ethics.
2. What is Moksa? Write a note on it.
3. Explain the various stages of voluntary actions.
4. Do you agree with the view that “end justifies the means”?
5. Explain the scope of Ethics.

8 marks Question (Long answer)

1. Discuss the four Purusarthas.
2. What is the social significance of the concept of Purusarthas? Give a reasoned answer.
3. What is Moksa or Liberation? How do the different systems of Indian philosophy conceive its nature?
4. Explain the concept of Dharma and Artha.

UNIT - VIII : RELIGION – ITS MEANING, NATURE, RELIGION AND MORALITY

1 marks Question (Very Short)

- i) The word 'Religion' is derived from which Latin word?
- ii) What is the meaning of the word 'Religare'?
- iii) What is the etymological meaning of the word 'Religion'?
- iv) Mention three elements involved in religion.
- v) State one important characteristic of religion.
- vi) From which Sanskrit root is the word 'Dharma' derived?
- vii) According to whom "Religion is the knowledge possessed by the finite mind of its nature as absolute mind"?
- viii) Do you believe that religion is an end in itself?
- ix) Who has defined religion in terms of values?
- x) Who said "Moral obligation and responsibility lead to the idea of God"?
- xi) "Morality is the source of religion" – who supports this view?
- xii) "Religion is morality touched with emotion" – Write the name the philosopher associate with the statement.

2 marks Question (Short)

- i) Define Kant's definition of Religion.
- ii) What is religion according to Mathew Arnold?
- iii) Mention two points of similarity between religion and morality.
- iv) Mention two points of difference between religion and morality.
- v) State the definition of religion which is most satisfactory among the definitions of religion.
- vi) What is the defect of Kant's definition of religion?
- vii) Define Religion.

3 marks Question

- i) Write Hegel's definition of religion. What are its defects?
- ii) Mention three characteristics of religion.

- iii) Describe Flint's definition of religion.
- iv) Distinguish between religion and morality.

6 marks Question

1. Discuss the nature of religion.
2. Discuss the view that religion and morality are independent.
3. "Religion is the source of morality" – Discuss.
4. "Morality is the source of religion" – Discuss.
5. Explain the inter-dependence of religion and morality.

8 marks Question (Long answer)

1. State the points of similarities and dissimilarities between religion and morality.
2. Critically discuss the view "Morality is the source of religion".

★★★★★
